

Choices are never easy.

Choose Easterseals Crossroads with confidence that we are your family's partner in achieving milestones in growth and development for your child.

We can be your agency of choice. We provide home and community-based services with experienced physical, occupational, developmental and speech-language pathologists who will work with your family to achieve developmental goals that could include communicating or improving mobility. We have First Steps providers trained in family guided routine based intervention.

We give you more. Our agency is one of the largest and most diverse Easterseals affiliates providing our therapists with access to other support services and program contacts including camps for individuals with disabilities, respite services, employment programs, autism programs, augmentative/alternative communication assessments/treatments, and more.
